

The Modular Pad Mount Series Quick Connect System allows for everything from a simple, single-tier Cam-Lok™ connection cabinet to a 3-tier, side-by-side, multi-function unit with turn-key portable generator and load bank connections, transfer switches, distribution breakers, paralleling common buss, and any of the listed available features.

## Available Features:

- NEMA 3RX aluminum construction with quarter-turn latches and powder-coated finish
- Completely sealed when not in use
- Tamper-resistant while in use via cable slots and pad-lockable latches
- Standard phase rotation monitor
- Color-coded 16 Series Cam input/output connectors
- 100kA plated copper smart T-slot buss
- Two-wire auto start terminal with signal destination switch
- Hardwire (Smart Lugs)
- Transfer switch (manual or automatic)
- Dual purpose (Load Bank & Portable Generator)
- Trapped key access
- Load bank breaker with shunt trip
- Output breakers
- 20A, 30A, & 50A receptacles
- Voltage test port
- Heater with thermostat
- Matching 16 Series Cam cable accessories
- Riser box

## Applications:

- 400 to 6000A systems for portable generators, load banks, or multifunction cabinets to combine all other emergency power requirements needed to satisfy job specifications and updated codes.
